

Los Angeles County Infant Mortality, Preterm Births, and Birthweight 2008 Factsheet

Infant Mortality* by Race/Ethnicity Los Angeles County 2000-2008

- The Healthy People 2010 objective is to reduce the infant mortality rate to no more than 4.5 per 1,000 live births.
- The infant mortality rate for Los Angeles County has remained stable around 4.9 to 5.5 with an average of 5.1 infant deaths per 1,000 live births between 2000 and 2008.
- In 2008, African Americans comprised 7.5% (11,016) of all 147,684 live births in Los Angeles County and 18% (134) of all 742 infant deaths.
- The infant mortality rate for African Americans in Los Angeles County is twice as high as the overall Los Angeles County rate and three times that of White babies.
- Almost 16% of African American babies in Los Angeles County were born preterm compared to 9.4% of Asian/Pacific Islander babies in 2008.
- Very low birthweight/low birthweight is the leading cause of infant mortality in Los Angeles County. Almost 14% of all African American babies were born very low birthweight and low birthweight.
- Service Planning Area 1 and 6 in Los Angeles County have the highest rate of preterm births, very low birthweight, and low birthweight. Consequently they have the lowest rate of normal birthweight births.

*Infant Mortality Rate: Infant deaths occurring at less than 365 days per 1,000 live births.
