Notes: Please see Definition Section for how selected maternal and infant characteristics were defined for the purpose of this analysis. Only mothers who reside in LA County were selected for analysis. Therefore, non-LA County hospitals where mothers from LAC delivered may be included in the Non-DHS Hospital Group. The analysis excludes non-hospital birth, birth centers not listed in the birth record documentation, births in clinics or doctor's office, birth in transit, births in unclassifiable locations, or out of state hospital births. Vaginal - "Other" category under Method of Delivery includes vaginal-spontaneous after previous C-section, vaginal-forceps, vaginal-forceps after previous C-section, vaginal-vacuum and vaginal after previous C-section. \*Infant mortality rates by hospital type were based on 2015 birth cohort data and were calculated based on live births that were born in the respective hospital and later died within the first year of birth.
