MCP Community Reinvestment Plans

Overview of DHCS Community Reinvestment Requirements

DHCS requires Medi-Cal Managed Care Plans (MCPs) to reinvest a portion of annual net income into community-based initiatives that address local needs and improve health outcomes.

MCPs are to leverage the findings of the county level Community Health Assessment (CHA), Community Health Improvement Plan (CHIP), and Behavioral Health Transformation (BHT) to inform reinvestment activities; funded activities must align with, at least, one Mandatory Use Categories outlined in the APL.

MCPs are to collaborate with their Plan Partners in the county, County Public Health (PH), and County Behavioral Health (BH), and ensure that County PH and County BH attest to the fact that they are agreeable to the investment strategy.

MCPs must also engage the County Advisory Committees (CACs) for feedback on the reinvestment activities.

MCPs will submit a Community Reinvestment Plan to DHCS with attestations from the respective County PH and County BH departments.

Visual from Health Net's 10/14 Community Reinvestment Briefing, more information can be found here: https://www.dhcs.ca.gov/community-reinvestments/

MCP Community Reinvestment Plans

DHCS Mandatory Use Categories for Community Reinvestment Activities

Mandatory Use Category	Description
Cultivating Neighborhoods and Built Environment	Investments that create neighborhoods and environments that promote health, well-being and safety.
Cultivating a Health Care Workforce	Investments that build the next generation of health care workers including, for example, addressing workforce shortages and establishing a health care career pipeline for youth and young adults (e.g., Community Health Workers, Doulas).
Cultivating Well-Being for Priority Populations	Investments that address community-specific needs through tailored supports and services not covered under the MCP Contract to priority populations such as those identified through the CHA/CHIP process
Cultivating Local Communities	Investments that bolster the lives of individuals and contribute to the advancement and wellbeing of a community such as through education initiatives, employment and training programs, programs to eradicate poverty, and initiatives that address social isolation.
Cultivating Improved Health*	Investments targeted toward upstream root causes of poor health that address immediate and long-term health related needs as defined by the community.

* MCPs with positive net income and with a county in Enforcement Tiers 2 or 3 are subject to both the Base Community Reinvestment and the Quality Achievement Community Reinvestment requirements for that county. 100% percent of the Quality Achievement investment must fall under the Cultivating Improved Health Use Category
